

## **Capacity Enhancement Grant Proposal 2017-2018**

The 2017-18 academic year will see several developments that will be supported by the Capacity Enhancement Grant.

Following last year's development plan, the IT Developments Committee will evaluate and review the existing eLearning platforms: Denbigh, Haiku and ManageBac, and put together proposals for centralizing and standardizing all ICT resources to enhance and support an effective and efficient delivery of Learning and Teaching in and out of classes. Whenever necessary, other alternatives in the market will be investigated and acquired for further developments to the entire college community. Such research will be funded by this year's grant.

Meanwhile, the maintenance and continual improvement of the existing college networks, such as the installation of Apple TVs, will also be supported by this grant, as before.

### **Criteria for Evaluation:**

- Checklist of demands/needs from all stakeholders within college, from academic to admin to residential;
- Survey of existing software/systems in the market;
- Comparison of several selected products within our budget constraints
- Survey of staff and student preference(s) of selected products;
- Recommendation for 2018-2019, including budget requests.
